#### Vinification

Extra-Brut Rosé is only produced in very good quality years for the black grape varieties. The Rosé d'Assemblage process is unique in that it allows to harmonize a white champagne to which is added a small quantity of red wine of Champagne, coming from the Grand Cru village of Mailly. Each harvest brings different structures and colour intensities. The chance to work with addition of red wine makes it possible to be more stable and more precise in the colour. Ployez-Jacquemart red wines are made in oak barrels, revealing an elegant, slightly woody touch. They only use very low dosage in order to let all the fruit and aromas of the wine express themselves.
